

Descendants of John Appleby

Following the unexpected discovery that our yDNA tester for this line is an exact match to a descendant of the Co Durham Haswell line of Applebys - we have a theory that John Appleby who married Elizabeth Castledine in London in 1783 was actually the son of William and Ann (Brown) who was born in 1753 in Witton Gilbert, Co Durham. The Durham born John Appleby does not appear in burial or marriage records in Durham, but to date we have not found any concrete evidence of that John Appleby's travel from Durham to London.
